**Directions for use:****Surface Preparation:**

Substrate should be sanded using 120, 150 or 180 grit sandpaper prior to staining or coating. Stain systems recommended under this product are Promatch® Aqua Wiping Stains 824-50XX or 824-51XX and Promatch C-Mix 250 VOC Stains 825-39XX.

Dry times are greatly affected by film build, porosity of substrate, air movement as well as heat and humidity. Temperatures are based on actual board temperature. This may vary depending on length of time for boards to reach these temperatures. Minimum curing temperatures of 64°F/18°C must be maintained throughout the curing cycle to achieve the film integrity as stated in product features.
