

AquaSilk™

WATERBORNE SYSTEMS

POWERED BY WATER

AquaSilk multi-tiered systems for confident results

AquaSilk is a complete line of waterborne systems designed to meet performance needs across a wide range of applications. From sealers and primers to pigmented topcoats, AquaSilk coatings deliver durability, performance, and a consistently high-quality finish.

Whether you're coating cabinetry or high-end architectural millwork, AquaSilk provides a structured solution that helps you choose the right product for the job — all within a cohesive, high-performance system that combines strength, versatility, and consistency.

Powered by water.

Why choose waterborne?

Advanced waterborne technology for superior performance

Waterborne coatings are increasingly used for professional and industrial wood applications in North America and globally, driven by stricter regulations, evolving customer expectations, and major advances in waterborne technologies.

Whether you're already using waterborne coatings or considering making the switch, make the right choice with confidence, and use AquaSilk coating systems.

Why are waterborne coatings reshaping the market?

Waterborne coatings provide numerous advantages while helping to reduce your environmental impact and support your sustainability goals.

Lower VOCs

- Help manufacturers comply with regulations
- Improves air quality performance

Safer work environment

- Easier clean up
- Minimal odor
- Reduced toxic elements

Less hazardous

- Less harmful, minimal off-gassing
- Easy to transport without special transportation requirements*

*Transport should consider compliance with frost sensitivity specifications.

Discover AquaSilk

Strong coatings, powered by water

Performance you can trust.

From everyday use to high-traffic areas, AquaSilk waterborne coating systems provide reliable protection across diverse applications. With a smooth and durable finish, AquaSilk helps surfaces stand up to daily wear while maintaining their quality over time.

Beauty without compromise

Invisible protection, visible perfection.

AquaSilk coatings deliver a flawless, silky-smooth finish that enhances the natural character of wood. Rich in clarity and depth, AquaSilk brings color and sheen to life across a full range of finishes—creating surfaces that feel refined and look effortlessly beautiful.

Flow with confidence.

Made locally. Backed by experts.

AquaSilk coating systems are built on decades of industry-leading research and development. All are manufactured in state-of-the-art American facilities and supported by a wide distributor network. As part of AkzoNobel, our experienced team has the tools and expertise to deliver unrivaled service and support that have earned the trust of professionals worldwide.

It all adds up

When it comes to sustainability, every action counts. From renewable materials to smart adjustments along the value chain, being part of AkzoNobel means we're also committed to helping you seize opportunities to reduce waste, save energy, reduce your carbon footprint and save costs.

Join the sustainability journey

We're continually exploring new options to make our solutions more sustainable. AquaSilk Waterborne Coating Systems could help you on your sustainability journey.
